1. Installing the Theme

Preus Theme is can be installed directly from your WordPress Dashboard. To install, go to **Appearance** > **Themes** > **Install Themes** & search for Preus. From there you can directly Install and activate the theme. If this method is not available to you, then you can use the downloaded copy of this theme and install manually.

From your web host's file manager, Navigate to the **/wp-content/themes/** folder, which is present under your wordpress installation. Upload Preus.zip to this directory and extract it there. Once you have done that, you will be able to see Preus theme under **Appearance** > **Themes** in your dashboard from where you can activate it

Another option to install this theme is to directly upload the zip in wordpress dashboard. Go to **Appearance** > **Themes** > **Install Themes** > **Upload** and then upload the preus.zip file That's it.

2. Preus Settings

All Settings which are Specific to Preus could be found in **Appearance** > **Preus Settings.** The various settings available are:

i) Basic Settings - To Configure Logo, add your copyright message, insert some javascript in Theme's Header and footer.

ii) Layout Settings - To Choose Sidebar Location and Add Custom CSS.

iii) Carousel Settings - This will enable the Carousel, which shows on top of Blog page.

iv) Slider Settings - Pro Version only.

v) Social Settings - Instruction to add URL/ID specified with each network.

vi) Support - Details Regarding Theme Support

3. Setting up the Carousel

Carousel is the set of Square Images, inside a slider present on top of blog page. Preus Theme Comes with a built in support for the carousel, which eliminates the need of using any external plugins. To set up the carousel, all you need to do is go to! **Appearance** > **Preus Settings** > **Carousel Settings.**

Check the option "Enable Carousel". The Carousel supports a Maximum of 12 images, and a Minimum of 4 Images. To enable Carousel, it is also important that you select a category. Make sure that the category you select has atleast 4 Posts, with a Featured Image.

Thumbnails in Carousel Not showing up? Make sure that you have set a Featured image for each of the posts. To Set Featured Images, Edit the post. On the Edit post page, you will see an option to Set Featured Image on the Bottom Right area. You can set any featured image you want, either upload a new one or choose from your library.

4. Parallax Header

To set up the Parallax Header, all you need to do is go to **Appearance** > **Header,** and upload an image of dimension 1920x400px. If you do not have an image of that dimension, then do not worry. Upload the image you have, and WordPress will open a screen which will allow you to crop the image to those dimensions with ease.

5. Full Width Page

To create a page without a sidebar. Go to Create Page, and change its template to Full Width. The option to change the Template is available in the Edit Page's "Page Attributes" Section.

6. Sidebar Layouts

Preus Supports 2 Layout styles for blog pages.

- 2 Column - Right sidebar
- 2 Column - Left sidebar

These layouts can be selected from from **Appearance** > **Preus Settings** > **Layout Settings.**

7. Post Formats

Preus supports 3 Post Formats: Standard, Image and Video.

i) Standard - Use this post format when your post has general content. Anything can be accepted in this.

ii) Video - This post format should be used, if you are showcasing an embedded video(from youtube, or anywhere else).

iii) Image - Use this post format to showcase an image.

Why use these post formats? - If you are in a proper habit of using proper post formats it will be beneficial for you. Many plugins are dependant on Post formats for functionality. Preus renders different post formats differently. Preus plus has

extended functionality depending on these post formats. So, its recommened that you use the right post format always, even if you don't notice much difference.

8. Navigation Menus

Preus Supports 2 Navigation menus, and both are responsive in Nature. To Set up the Navigation Menus, please create a menu from **Appearance** > **Menus,** and assign the menus to Primary Menu and/or Top Menu. Both these menus can be different.

Top Menu - Supports only 1 SubMenu level. For Responsive and Non Responsive Modes.

Primary Menu - Supports 3 SubMenu Level on Larger Devices. And only 1 Level on Smaller Devices. Pro Version Supports all Levels in all devices.
